Gossip fit to print:

Jackie Jackson is the new Editor for Suncoast Information Specialists Info Newsletter. Shirl Kennedy is "retiring" from the position after serving the organization in this capacity for some time now.

Reports:

Tina Neville shares this report from ALA:

A very interesting program was offered entitled: "Shaping Reference Services: Reference Success Stories" which discussed several innovative projects. Anita Lowry from the University of Iowa described a project called the "Information Arcade". In addition to the usual electronic library resources, students at the Arcade have access to manipulation software (spreadsheets, word processing and databases) and to multimedia equipment (scanners, VCRs, etc.) allowing them to analyze and create their own documents right at a library workstation. At least one professor at the Univ. of Iowa used these resources to create a hypertext program for his class and then asked his students to create their own hypertext project. The students seemed very motivated by the kinds of information they were able to locate and by the opportunity to learn new technology skills. For more information on the Information Arcade try accessing:

http://www.arcade.uiowa.edu/arcade.html

Also speaking at the meeting was Chris Ferguson of the Leavey Library, University of Southern California. This unique new facility is open 24 hours per day and provides more than one hundred networked workstations and twenty-one collaborative workrooms.

The library also provides what they refer to as "three-dimensional reference service" consisting of:

"navigation assistants" -- well trained student workers who roam the floor answering basic questions
"computer consultants" -- computer experts available to answer questions regarding software, etc.
"research consultants" -- reference librarians who are available to answer library resource questions

The Leavey Library staff also provides walk-in workshops and classroom presentations. This new concept in library service has had an overwhelmingly enthusiastic response from its student users. A final note for those who fear that we are being overrun by computers: the perimeter of the Leavey Library reference area houses their print collection of resources.

Automation News:

New Scanner and Software

Ed Sanchez has installed an HP ScanJet 3C color scanner at the Reserves workstation. The software that came with it is also loaded; including Calera WordScan Optical Character Recognition (OCR) software, HP Scanjet Copy software for producing copies of scanned images on black/white or color printers, and Photo-Paint for photo editing and Bitmap creation projects. Jackie Jackson will be available for consultation.

Menu software at CD-ROM workstations 4-7 is being installed. It is easy to use, improves security and keeps statistics. DougMenu is the name and it is freeware. Comments and suggestions are welcome.

Technical Services News:

Renee Stokes reports: New Recreational Reading:

1. The Bookman's Wake        John Dunning
2. The Codicil                Tom Topor
3. True Crime                 Andrew Klavan
4. Brothers and Sisters       Bebe Moore Campbell
5. Juror (The)                George Dawes Green

For a list of new media items, see Appendix 1.

Regina Bringas reports that Tech Services with, the help of Kim, has completed the semi-annual shift. All of the weekly and bi-weekly periodicals have been moved from the current shelves (orange) to the "old" shelves (behind the stairwell).

Internet & other techie stuff:

Virginia shares this info:

EARTHWATCH RADIO SCRIPTS AVAILABLE ON THE
INTERNET FROM UNIVERSITY OF WISCONSIN--MADISON

The University of Wisconsin -Madison has put scripts from its award winning _Earthwatch Radio_ program on its WisciINFO system which is connected to the Internet.

_Earthwatch Radio_ is a two minute program on science and the environment produced at UW-Madison by the Sea Grant Institute and the Institute for Environmental Studies. The program is heard on more than 160 radio stations in the United States and Canada. The script for each program is one page long, and these short stories offer concise, clearly written reports on a variety of environmental topics, especially those regarding the Great Lakes region.

If you use Mosaic or another World Wide Web browser, you can use the following URL to access Earthwatch scripts.

gopher://gopher.adp.wisc.edu:70/11/browse/.METASVIEW

There are some interesting articles in August 1995 issue of Internet World about government information on the Internet, e.g. "Of, by and for the people," p. 29+
