Student Government Justices
by Hilary Thomson
Office Assistant, Student Government

Article VI, Section 1 of the Student Government Constitution deals with the establishment of a judicial branch:

"There will be a Judicial Branch for the interpretation of constitutional questions and for the appeal of decisions rendered by Student Government."

Consequently, Student Government has three illustrious Justices: Mark Meyers, Bill Asenjo, and Willie Roth.

Meyers is a Ph.D. candidate in Marine Science. He became a Justice in the summer semester of 1988. Nominated by SG Vice-President Andrew David, Meyers believes that "in this age of political partisanship, the role of Justice means accepting the responsibility for making fair and impartial rulings on disputes arising from Student Government's decisions."

Willie Roth is an Elementary Education major. Nominated to the position of Justice by Kathryn Malaxos, SG President, Roth has also served since the summer term. When asked what being a Justice meant to him, Roth enthusiastically exclaimed, "Let justice prevail!"

Bill Asenjo, SG's third Justice, is a psychology major here a Bayboro. He believes the honor of being selected as a Justice "is a vote of confidence from SG, that they trust my impartiality, and I would like to think that it means I have some semblance of maturity."

The Justices are carefully chosen through a nomination process and then selected by vote of the SG membership. The Justices are highly respected and SG is assured that their valued judgments thoughtful and well-researched.

Education Expo

Six regional county school systems have been invited to participate in Education Expo, which will be held on March 9 in BAY-108. All spring Education candidates for graduation are encouraged to attend, according to Dr. Sue Street, Coordinator of Counseling.
Where's Zat? (Part 2)
by Bill Asenjo
Vice-President, Bayboro Geographic Society

With the passing of National Geographic Awareness Week (NGAW), it appears that stimulated interest also produces questions. What follows is an attempt to answer the most often asked:

1. "Was the Crow's Nest article/quiz the official survey conducted by Prof. Schaleman and the Bayboro Geographic Society?"
   
   No. To quote the last sentence prior to the list of questions in November's Crow's Nest, "In the interest of NGAW, I've taken it upon myself to submit the following little quiz (calm down, it won't affect your GPA)."

   The other quiz you heard so much about and which received Iredia coverage in the St. Petersburg Times and on television is repeated at the end of this article. (Statistical results are also provided.)

2. "OK, but what about the quiz in the Crow's Nest?"

   The stats as to how poorly U.S. students did were taken from the March 1988 issue of National Geographic magazine.

   The answers to most of those questions are an open-and-shut case; however, there are a couple that were debated:

   Q: What is the world's largest island?
   
   A: Greenland.

   Some of you queried, "Hey what about Australia?" Ahhh, not really. According to the Rand McNally-Goode's World Atlas (p. 246), Greenland comes in first and New Guinea ranks a distant second. Apparently, Australia is considered first and foremost a continent which happens to be surrounded by water.

   Whipping out the Webster's, "island--a land mass not as large as a continent, surrounded by water...." Naturally, if you don't like that definition, then North America, north of the Panama Canal, could be considered an island, see what I mean? Actually, 80-100 million years ago, before continental drift/plate tectonics did its stuff, there was only one big land mass, Pangaea.

   In all fairness, and so you don't think I dug around some esoteric source for these questions, the inspiration for this question (and several others) came from the game, Trivial Pursuit (TP). So, remember the next time you play TP, the answer to this one's Greenland.

3. Another question that created discussion was, "What's the world's longest river?" Answer: the Nile. Again, not relying on the say-so of TP (and remembering Prof. Schaleman's World Geography class), I verified this answer by consulting Rand McNally/Goode's World Atlas (p. 246) and lo and behold, the Nile comes in first, a close second is the Amazon and third (by less than 200 miles) is our own Mississippi.

   Still not satisfied? Here's a better idea... take a geography course. But, be warned! You may get to like it!

National Geographic Awareness Week
November 13-19, 1988

With less than a month left in the semester, I'm once again drowning in self-centered preoccupation...upcoming finals, registration for the next academic term, and research papers. And, of course, the dwindling number of days left for holiday shopping.

Recently, a friend/fellow student helped rouse me from my morass of "me" by informing me of the following:

A terminally ill child, David, has much simpler concerns. He has a single wish: to be listed in the Guinness Book of World Records under the category "Most postcards received." Postcards should be addressed to:

"David"
Florida Child's Wish Come True
Box 5997
Spring Hill, FL 34606-0938

I imagine a few words of encouragement would be appropriate. My card said something like, "Here's hoping you break the record, lil' buddy!" I don't know about you, but it never ceases to amaze me how a few moments of my time not spent on me, always seems to put things in proper perspective.

**Fiction Contest Winners**

USF student Corey C. Bennett won the third annual Bayboro Fiction Contest, sponsored by the Society for the Advancement of the Poynter Library. Her story, "Green River," is about the effects of streaking on a fictional small Florida town. Bennett, a 22-year-old English major, says her story is based on a true incident that occurred in 1974. First prize was $250.00.

USF graduate student Michael M. Gearhart won a $100 second prize for "Waitresses." The third prize of $100 went to Anne Manette Ayas for "The Way Home." Honorable Mentions were received by Delroy Thompson for "Waiting Games" and to Elizabeth Grace Brackman for "July."

The 48 entries were narrowed to 10 stories judged by Dr. Susan Sutliff-Brown, a Joyce scholar at Manatee Community College.

The contest was open to any USF student registered part of full time for the 1988 fall semester.
