Marine Science

The Marine Science Department of USF will present two public lectures on ocean environments at 8 PM in the Auditorium, Building A.

Dr. John Briggs, Professor of Marine Science, will talk about the NASA backed research he has done in marine, fresh water and terrestrial areas that will give a global range to his topic, "Centers of Evolution." The lecture is scheduled for April 20.

On May 18, Dr. Norman Blake, Associate Professor of Marine Science, will speak on "Cholera—Can We Continue to Eat Shellfish?"

The lectures are free and open to the public. Each will be followed by a question and answer period. For further information, call 893-9130.

Honor Week

Congratulations to the students who received honors and awards during USF Honor Week! These students were noted in a recent issue of the Crow's Nest. However, several students were inadvertently omitted. These students are:

Winner of Phi Kappa Phi Fellowship for the University of South Florida

GLENNDA STEL Nicki

Phi Kappa Phi (Academic Honorary)

GLENNDAA STEL NICKI

KATHLEEN HAUSER

GLENNDAA STEL NICKI

CATHERINE ULM

GLENNDAA STEL NICKI

KAPPA DELTA PI

Kappa Delta Pi, an Honor Society in Education, held an induction ceremony on April 14 for the Lambda Tau Chapter (USF St. Pete). Names of the new members are listed on page two. ROGER LUTZ was named as the 1981-82 winner of Kappa Delta Pi's Academic and Service Award.

(continued on p. 2)
photo exhibit
"Images of Work: Birmingham, 1894-1937," an exhibit of historical photographs, is on display in the Nelson Poynter Memorial Library. The exhibit, organized by historians Mitch Menzer and Mike Williams, is sponsored by the Alabama Folklife Association and the Archive of American Minority Cultures at the University of Alabama, and is funded by grants from the National Endowment for the Humanities and the Committee for the Humanities in Alabama.

Forty-six photos taken between the years 1894 and 1937 are included in the exhibit. Photos show workers performing such tasks as drilling an ore face, loading and pushing coal cars in an underground mine, pulling a molten "muck ball" from a puddling furnace, casting pig iron, pulling coke from an oven, and repairing track after a train derailment. Other photos show workers in company-owned villages, a company store, and laborers in a convict-lease work gang. A 4000 word text supplements the photographs with information concerning the history of Birmingham's development, safety in the workplace, life in company-owned villages, wage rates, working hours, specific tasks involved in mining coal and foundry iron, unionization struggles, the experience of black workers, and the convict lease system.

radioactivity found in coastal waters

Researchers at USF have discovered unusually high levels of radioactivity in the coastal waters of west Florida, including Tampa Bay.

Associate Professor Kent Fanning, Assistant Professor Robert Byrne and chemistry analyst Jabe Breland, all of the St. Petersburg Campus marine science department, reported their findings in a recent issue of Science magazine.

During the 14-month investigation three important conclusions emerged: First, the continental shelf waters of the Gulf of Mexico are highly enriched in radium and radon as compared to other U.S. coastal waters; second, both nuclides are supplied by geothermal springs to shelf waters southwest of Fort Myers; and third, the passage of winter storm fronts across the shelf appears to produce radon degassing into the atmosphere.

According to the researchers, "...Tampa Bay radium levels reached 350 dpm (disintegrations per minute) per 100 liters, and radon activities reached 700 dpm per 100 liters. Some radon activities near geothermal springs southwest of Fort Myers were roughly twice those in Tampa Bay. By comparison, the Hudson estuary and New York Bight had radium activities of only 9.5 to 10 dpm per 100 liters and the plume of the Pen DeRiv in South Carolina had radium activities of 10 to 20 dmp per 100 liters."

The most probable cause for the high levels of radium and radon is the mineralogy and stratigraphy of west central Florida with formations that are rich in phosphate deposits and associated uranium, said the report. The formations are mined for phosphate in many places, and during the processing of the ore, radium tends to concentrate in a gypsum residue that is then left in massive piles exposed to rain. Streams in the phosphate areas have enhanced activities of radium and radon as compared to normal surface runoff.

Although the full impact of the study is not yet known, Byrne and Fanning pointed out that there was no cause for alarm. "The main implication," Fanning said, "is that we are living in an environment with more radioactivity than others so we have to be a little more concerned about the long-term low-level exposure. It is not known how much of this radioactivity is getting into the food chain."

The researchers are now engaged in further study to determine what effect the radium and radon levels would have on the food chain and whether the nuclides are being carried into the Gulf Stream.

"Finding the nuclides suggests to us that we should be looking for other radioactive materials as well," said Byrne.

(continued from p.4)

Data for their study were obtained by two cruises in 1980 and half-day sampling trips around Tampa Bay in 1981. Samples were taken off the coast of Sarasota, south of Fort Myers and about 70 miles out into the Gulf.

**tennis tourney**

Congratulations to the winners of the USF Spring Tennis Tournament (completed April 4):

Men's Singles Winner--Roger Burke
Second Place--Dave Williams
Winner of Consolation Round--Bill Miller (Marine Science)

Women's Singles Winner--Marlene Flament
Second Place--Ann Sackett
Winner of Consolation Round--Eila Hanni

Doubles Winner--Bill Miller (Marine Science) and Dave Williams
Second Place--Sam Fustukjian and Marlene Flament
Winner of Consolation Round--Roger Burke and Eila Hanni

Trophies for first place will be displayed at the Card Catalogue section of the Library until they can be displayed in the trophy case of the new student services building.

The Tournament was coordinated by Ann Sackett and Sam Fustukjian.

**placement services registration**

Those seniors desiring to have the services of the Placement Office during their last year and for the three months following graduation must register with that Office prior to graduation. REGISTRATION AFTER THAT TIME OR ANY SUBSEQUENT TIME AS AN ALUMNUS WILL REQUIRE THE PAYMENT OF $15.00 for the service.

Registration packets are available for seniors in the Placement Office (SPE-117) on the St. Petersburg Campus.

**graduation announcements**

Official USF Commencement announcements may be purchased at the Activities Office (SPE-112) for 50¢ each. CASH ONLY! Students may buy as many announcements as desired—while they last.
financial controller to speaker
Richard J. McDowell, Financial Controller of Critikon, Inc., a division of Johnson & Johnson, will discuss "Financial Analysis of New Product Development" on Tuesday, April 20 at 1:15 PM in SPE-102. The presentation will be part of Prof. Sabra Callan's Cost Accounting class. For further information, please contact Prof. Callan, 893-9154.

softball
The Student Business Association (SBA) and the Bayboro Computer Group joined forces to field a team against the Student Accounting Organization (SAO) softball team earlier in Semester II. Since the victors did not want the game to appear to be too one-sided, they made some changes to restrict the scoring. Congratulations to the SBA/Computer Club combo—who invite SAO to participate in a re-match!

A USF St. Pete Men's Softball Team participates in a City Softball League. Games are played on Tuesday evenings at Lake Vista Park. Contact the Recreation Office at 893-9129 for details.

ticket sales subsidization
USF/SP believes that participation in cultural and recreational activities is an integral part of a student's formal education and that constructive use of leisure time is a desirable goal.

Due to the lack of cultural and recreational resources on the St. Petersburg Campus, student participation in many community events is directly subsidized to compensate for these deficiencies.

Students taking the majority of hours on the St. Pete Campus will be allocated $1.00 per credit hour to be applied toward subsidization. Proof of fee payment (listing your hours) and your validated student photo I.D. are required when using your subsidy.

Eligible students must come to the Activities Office (SPE-112) to initiate ticket arrangements. Students may buy as many tickets as desired but only the allocated amount of subsidy will be deducted from the purchase. Subsidy may be used for more than one event—until the individual's portion of subsidy is depleted.

The student must pay at least $1.00 per subsidized ticket.

The Subsidization Program is conducted each session. Tickets are on sale from the first to the last day of each term. Subsidization is not available during term breaks. Subsidization is NON-TRANSFERABLE.

Once you have used your subsidy, you may still buy tickets at our PURCHASE PRICE, which is often much lower than the regular retail price. For example:

<table>
<thead>
<tr>
<th></th>
<th>REGULAR COST</th>
<th>USF COST</th>
<th>SUBSIDY PRICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sunset Golf and</td>
<td>Up to $7.00</td>
<td>$3.00</td>
<td>As low as $1.00 by applying $2.00 of your subsidy. Note: a student taking 7 hours (times $1.00 per hour) would have $7.00 subsidy.</td>
</tr>
<tr>
<td>Country Club</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>GREENS FEES</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

subsidized tickets may be purchased for events at Bayfront Center, Asolo theatre in Sarasota (during its repertory season), Country Dinner Playhouse (USF group night), Palisades Theatre, Busch Gardens and other places. Faculty and staff may buy tickets at our PURCHASE PRICE.

For further information . . . and other discounts . . . contact the Activities Office.
