Signature Page for Academic Program

Academic Program: Anthropology

Person Responsible: Jay Sokolovsky and John Arthur  Student Advisor and Program Chair, K. Arthur manages and completes ALC

Summary Statement – Academic Program Performance in Fall 2016 & Spring 2017
Provide a summary statement about the academic program performance over the previous year including high points & low points.

A: Program Meetings and Accomplishments:
This year the anthropology program met on Sept. 9, Oct. 24, Dec. 12, and April 28. We also resolved issues and often communicated through email.

• Course Schedules: We agreed upon and created class schedules for summer 2017, F2017 and Sp 2018 and discussed and agreed upon our 4 year course plan for students to complete graduation in a timely manner. We are trying to keep the electives to no more than 5 to make sure that all of the electives fill and this seems to be working well

• Mentoring: We discussed creating a canvas page to help track our majors and provide resources for them and assign each a mentor. However, we did not yet accomplish this and will work on it next year, we got derailed by extensive work required for the Master Academic Plan which was unexpected.

• Teaching Labs: Importantly, John and Anna worked to ensure that our teaching labs will have everything that we need. We teach Biological Anthropology, Human Evolution, Seminar in Archaeological method and theory, and in the near future Forensics--all of which require lab facilities to adequately teach and provide experience for our students. In spring 2017, we were assigned a new teaching lab in Davis Hall 265 (we requested two).
• **Anthropology Honors Society:** We decided to work on establishing an Honor Society. Kathy worked with the national chapter and we are IOTA Lambda Alpha, the 9th established chapter in Florida. The application process was extensive but we are not established. We still need to establish a bank account for dues and create flyers. Fees will be $35 for lifetime membership. We will hold our first event in October 2017 with a guest speaker.

• **Retention and Anthropology Club Events:** The anthropology program works to enhance student recruitment and retention. In 2017 we held our annual student graduation party, called and welcomed new students, attended new student recruitment open house events organized by USFSP, and assisted students in anthropology club events including: a joint dancing event with the South Asian Association, Trey Johnson and Chris Rodriguez presented their experience studying abroad, Fundraiser at Evos to support student travel to national conferences, Film preview *The Bones Remember* by Jay Sokolovsky, Tavern Fundraiser with games and raffle to support student travel to national conferences.

• We worked extensively on the MAP and here is the final:

---

**Anthropology Program MAP – Phase 3 – December 16, 2016**

**Our Strengths to Grow**

The USFSP Anthropology program is one of the most scholastically productive social science programs at USFSP. Its faculty have publications of single-author and edited books, top-tier academic journals, and grants from the National Science Foundation, Fulbright, the National Endowment for the Humanities and the Landes Foundation. This high-level research is brought into the classrooms and allows the students enrolled in anthropology courses to receive an outstanding education. Our seven-year review completed Spring 2016 stressed that the USFSP Anthropology Program should use these strengths as we seek to continue to grow in both student enrollment and full-time faculty. Anthropology as a holistic, cross-cultural discipline is a perfect place for students to become excited in pursuing this research. As indicated below the two outside reviewers cited the critical need for two faculty hires which both build key strengths in our program but also link to other emerging programs on the campus.

With faculty mentorship, our anthropology students are able to expand their skill sets and social networks, making them competitive for employment opportunities. Our anthropology students are among the most active student groups at the national, local, and university levels than any other discipline at USFSP. With partial funding from student government and their own fund raising efforts, our anthropology club students attended and presented at two recent American Anthropological Association conferences. Our students have also presented and received awards at the Society of Ethnobiology, Society for Applied Anthropology, Florida Academy of Sciences, Florida Anthropological Association, in addition to being well represented at the USFSP Undergraduate Colloquium. We are also starting an Anthropology Honors society through the Lambda Alpha National Honor Society, which will add more recognition to our anthropology students’ outstanding accomplishments.
We believe by highlighting our current faculty strengths in research and teaching that we will be able to achieve continuous growth as long as we have a commitment by the university to support our proposed endeavors. One of our program strengths is international field research. This has led to unique opportunities for our students to live and study in rural settings in Ethiopia, Peru, and Mexico. Drs. Kathy and John Arthur through their NSF and NEH grants have fully funded 11 USFSP undergraduate anthropology students to travel to Ethiopia to work alongside international researchers from different scientific disciplines such as geology, palynology, botany, and osteology. Dr. Ella Schmidt after the 2017 summer, will have taken 45 USFSP undergraduate students to Peru as part of her Honors course, Peoples of the Andes.

Since not all students can participate in an international expedition, our faculty has a series of local projects that allow students to become outstanding scholars. Dr. John Arthur has taught a field school at the Weedon Island Preserve since 2007, where student excavate and analyze the remains from an Native American shell mound dating to 1000 years ago. Dr. Jay Sokolovsky engages students to learn cultural anthropological skills through local community-based projects in his Methods in Cultural Anthropology, Urban Life and Culture and Visual Anthropology courses. Students working with Dr. Anna Dixon intern at the Capital Collateral Regional Counsel, a state agency in Tampa and also work in our research Archaeology Lab learning to analyze paleoethnobotany remains. It is these opportunities that the anthropology faculty give to the students to make them engaged in anthropology and to foster growth in our program.

Our Goals in Growing

A central recommendation of our outside program reviewers was a need to add two specific full-time faculty positions that will allow us to increase our student enrollment and build opportunities for their employment. One position is for a Biological/Medical/Forensic Anthropologist that not only fosters training in a key STEM component of anthropology but will be an integral part of the newly proposed BS in Forensic Studies and Justice. Such a position, along with current faculty, also allows us to build into our program unique skills training tied into the Health Sciences and Biology programs. The second position is for an Environmental Anthropologist that will enhance our international and local research projects, as well as complements other researchers working in environmental and sustainability fields. This position will also support a proposed Urban Society and Culture major.

Both Medical Anthropology and Environmental Sustainability are two fields that students have expressed interest in pursuing. These two fields also have great employment opportunities. According to the US Department of Labor Bureau of Labor Statistics, Forensics and Environmental Research have a 27% and 11% faster than average growth rate, respectively. These new faculty would enhance our student’s skill set to enable career paths into a myriad of different lines of work, such as law enforcement, cultural frameworks of sustainable communities, ethnobiology, human rights, environmental impact on health and disease, etc.

With these two full-time faculty hires, support resources are needed for both the program and students to succeed. We need additional research and teaching labs, where faculty can engage students in both research projects and in the classroom to give the students the necessary skills to compete in an increasing competitive job market. In addition, we need student internships and scholarships. These opportunities will make our students outstanding scholars and more competitive in the job market and for acceptance into high-caliber graduate programs. If we give students more opportunities, then they will be able to achieve their goals and be successful and contribute positively to the world community. It is through these past and current achievements that we feel that we can grow in both student enrollment and full-time faculty if we are given the necessary resources.
Over the next 3-5 years we would like to expand our number of undergraduate major to 100-120 students and continue our focus on training well-rounded but research oriented and capable students. Based on this to increase majors we will undertake to:

1. Expand our efforts with the campus recruitment office both on and off campus. We always have representation at our on-campus recruitment fairs. Our faculty, especially Kathy and John Arthur have been involved in carrying out student “learning journeys”

2. We will work the advisors at community colleges and especially St. Petersburg College. We were the first CAS major with a FUSE Program to recruit students during the first two years of their AA degree and ease them into the full anthropology major at USFSP.

3. Continue to offer courses which are on the cutting edge anthropology programs such as Community and Heritage Archaeology, Forensic Anthropology, Visual Anthropology, Ethnobotany.

Finally, if we are to project five years into the future and plan for a graduate Masters Program in Anthropology, this would require 3-4 additional faculty to carry out an innovative program linked to emerging employment opportunities.

B. Faculty achievements and working with students:

• Jay Sokolovsky (Professor) is the department chair for SCL in which the anthropology program is housed. Jay is the faculty sponsor of the anthropology club. Under his guidance our club became an official club of the American Anthropological Association and several of our students serve as the social media coordinator for the AAA’s Anthropology Now online publication. Jay mentored students as part of his ANT 4995 to do community based research in Williams Park, the St. Pete Saturday Morning Market, and in the Central Arts district.

• John Arthur (Associate Professor) is the program coordinator and advises students. John mentored a dozen students over the year focusing on the Weedon Island material, both in the lab (STG 216) and in the field as part of the ANT 4114 Seminar in Archaeological Method and Theory course. Also, was a Ph.D. committee member for Theresa Gilbertson, who graduated from the USF Tampa campus in 2015 and helped to mentor Elizabeth Southard, who is M.A. student at USF Tampa.

• Ella Schmidt (Associate Professor) Ella taught an Honor’s course in Tampa in connection with Study Abroad providing 45 students with two weeks in Cuzco Peru where students are working with Peacework a local indigenous community project. Ella Schmidt, Associate professor was a committee member of the following theses/dissertation: Karlana June. MA Thesis Committee Member (Aug. 2016-ongoing) – Journalism Media Studies USF St. Petersburg. “Qualitative content and framing analysis on U.S. media (print and online) who have/are reporting the known transgender murder victims”; Radha Moorthy. MA Thesis Committee Member (Sep. 2016-ongoing) – Government and International Affairs, USF Tampa. “Re-ethnicization of Second-Generation Non-Muslim Asian Indians in the U.S.”; Milena Janiec Grygo. Research and PhD Dissertation Committee Member (Sep. 2012-Aug.2016)- Geography Department, USF, Tampa “Situating Migrants in Contemporary Japan: From Public Spaces to Personal Experiences”. Dr. Schmidt is also the advisor for Sheena Mayo – USFSP - Honors Thesis Director – Fall 2015-Spring
Academic Learning Compact: 2016-2017 ANTHROPOLOGY

“... to ensure student achievement in undergraduate and graduate degree programs ...”

- Kathy Arthur (Associate Professor) worked with the Anthropology National Honor’s society to establish a chapter at USFSP for our students, which will be open to membership in the fall. She also served on a MLA exam committee for James Poorman and is the thesis advisor for Peggy Neal Honor’s thesis titled “The healing Scrolls of Ethiopia: Myth, Magic, and Meaning of Liturgical Art in Africa.” She offered Rethinking Anthropology in the Fall and assisted 12 students in their search for potential employers and graduate school, creation of portfolios, and CVs and letters of introduction for graduate school or employment after graduation. She wrote letters of recommendation for 3 students to attend graduate school.

- Anna Dixon (Lecturer) was hired as a full time instructor in anthropology beginning Fall 2015. This year I designed and taught the first Introduction to Forensic Anthropology class offered at USFSP. In October, I received national certification as Criminal Defense Investigator for the Criminal Defense Investigation Training Counsel. In the Fall of 2016, my four Directed Study students (Chris Rodriguez, Isis Navarro, Bryan Mayorga and Alyssa Delio) presented their work at the end of the semester at Poynter Corner. I can't tell you how many students I spent hours mentoring and writing letters for grad school/law school/med school at least half a dozen.

Summary Statement – Impact of Changes Made in Fall 2016 & Spring 2017

Provide a summary statement about changes that were made in your program as a result of ongoing assessment in the preceding year. Please discuss both the positive and negative impact of the changes.

A) Graduation and Enrollments Rates in Anthropology:
The anthropology program offers students the opportunity to select anthropology as a major, minor, or an ISS cognate. We had 58 majors in 2016-2017 with 7 or 12% of students graduating. However, I believe that the spring graduates are not yet counted, as this is as many students as we had graduate in the fall. Note last spring the infoCenter listed us with 8 graduates and now it is adjusted to 15. On average we have had a graduation rate of 23% of our majors over the last 5 years. The average number of students enrolled as anthropology majors in the last 5 years was 72.4. Within Arts and Sciences at USFSP there were 1952 (unduplicated headcount) students, 334 graduates. Anthropology represented 2% of the graduates in CAS at USFSP this year. Although our enrollment has fallen over the last few years, which we discussed with our program reviewers for suggestions, our graduations rates are very good. In light of the state’s and university administration emphasis on STEM degree areas seems to be deterring students from entering the social sciences, even though national labor department statistics suggest that degrees in social science are in demand.

According to [http://usfweb.usf.edu/DSS/INFOCENTER](http://usfweb.usf.edu/DSS/INFOCENTER) we had the following number of students enrolled and graduated in previous semesters as majors. Unduplicated headcount used.

*number not correct had this many in spring alone
** listed at 8 graduates and 63 major initially last year now updates!!
Academic Learning Compact: 2016-2017 ANTHROPOLOGY

“... to ensure student achievement in undergraduate and graduate degree programs ...”

B. Student accomplishments and future careers of our graduates:

Local and National Presentations:
- Valfredo G. Reis graduated Magna Cum Laude.
- Twelve anthropology majors attended the national American Anthropological Association conference.
- USFSP Research Symposium:
  - Isis Navarro presented her research for “Visual Artss Psychotherapy and Healing” Anna Dixon on
  - Heather Draskovich presented “Investigating Safety Harbor Pottery Function Within the Weeden Island Site. John Arthur
- Kayla Witeck’s poster on Ipomoea species was accepted for presentation at the Society for Ethnobiology meetings (international meetings) in Montreal this May. Kayla did this research as part of the 2015 Introduction to Ethnobotany class that I teach.
- Heather Draskovitch presented her poster listed above at the Florida Academy of Science and the Florida Anthropological Society.
- Sophia Battle presented her research concerning Neanderthal Diets at the American Anthropological Association Meeting.

Graduate School and Employment of our Graduates:
- Heather Draskovich was accepted with an academic scholarship to USF Tampa (Anthropology).
- Oshay Goodman continues to work in retail.
- Isis Navarro owns her own photography business, Luna Dulcinea Photography.
- Mario Quintana will attend Columbia University College of Dental Medicine.
- Bryan Mayorga and Alyssa Delio (former grad) applied for the Spiritual Ecology fellowship from the Kalliopeia Foundation (pending)
- Sophia Battle was accepted to the Vermont Law School with financial support.
- Jessica Vinson was accepted into grad school (Anthro) at Illinois State U after serving in the Peace Core in Mongolia
- Aprilyn Mendlik (former grad) just accepted a full-time counselor position at W. Va. School for the Deaf.
- Stephanie Chance (former grad) applied to graduate school (psychology) at Hunter and Columbia Colleges (pending)
- Terry Hutchings accepted position as Manager of Operations at the USF Tampa Main Library.

Awards:
- Isis Navarro and Heather Draskovich were awarded outstanding poster presentations at the USFSP Research symposium.
- Heather Draskovich was awarded the Outstanding Undergraduate Poster for Anthropological Science at the Florida Academy of Science.
- Emily Higginbotham applied for summer internship at Rutgers Robert Wood Johnson Medical School in Brunswick, New Jersey (pending)
C. Assessment Summary of 2015-2016:
In 2015-2016, we assessed student performance through ANT 4034 Methods, ANT 4935 Rethinking, ANT 4312 NorthAmerica, ANT 4302 Gender, and ANT 4905 (Visual) and all courses were taught by senior faculty. Overall, faculty noted that student performance was outstanding in all areas. They experienced a few issues with students dropping courses or not performing well later in the semester due to work issues. This is a consistent issue at this institution with many of our students working full-time. This particularly affects courses in which students need to participate intensely in research activities outside of the classroom.

1. Master Concepts Central to the Anthropological Perspective and Identifying major figures in the History of Anthropology was assessed in Theor

ies of Culture, Rethinking, Cross-Cultural Gender, and North American Indians this year. Students performed very well concerning mastering concepts central to anthropological perspectives and identifying major figures and schools of anthropological method and theory. Dr. Ella Schmidt and to a lesser extend Dr. Kathy Arthur noted that some students were not prepared to engage in critical thinking and constructing arguments regarding anthropological theory. It should be noted that most of these students were not anthropology majors, who were allowed to take the course. Dr. Kathy noted that this improved with the semester. Dr. Arthur noted that the class performance was bimodal indicating that some student put a lot of effort into preparing for exams, while other students did not.

2. Creation and Delivery of Oral Presentations, Written Presentations, and Group Discussion was assessed through the courses Theories of Culture, Rethinking, and North American Indians and Methods in Culture. For the most part, student performance was excellent in all classes concerning communication skills in oral presentations, group discussion, and written presentations. However, Dr. Kathy noticed that many students seemed shy and it was difficult to get them to engage in discussion on days when they were not in charge of leading discussion. Dr. Sokolovsky noted that students did not do as well as expected in their written presentations at the end of the semester and to mitigate this in the future, he is going to assign earlier writing assignment in the semester.

3. Student Critical Thinking Skills concerning global human diversity and ethics was assessed in the courses Rethinking, North American Indians, Methods in Cultural Research, and Gender in Cross-Culture. Faculty noted that this year student performance was very strong to outstanding. Dr. Ella Schmidt and to a lesser extend Dr. Kathy Arthur noted that some students were not prepared to engage in critical thinking and constructing arguments. It should be noted that most of these students were not anthropology majors, who were allowed to take the course. Dr. Kathy noted that this improved with the semester. Concerning demonstrating the standards of ethics, Dr. Kathy spent three weeks on the topic and brought in guest
Academic Learning Compact: 2016-2017 ANTHROPOLOGY
“...to ensure student achievement in undergraduate and graduate degree programs...”

lecturer Dr. Hugh LaFollette a philosophy professor who is an ethics expert, both these approaches seemed to help improve class performance and deeper thinking concerning ethics.

4. Student Civic Engagement Skills, in approaching solutions to human problems through anthropological methods was assessed in the courses Methods in Cultural Research and Seminar in Archaeological Methods and Theory. Last year Dr. Sokolovsky indicated that research projects were good but not as strong as other results. He provided more concrete method readings this time when he taught the course which seemed to alleviate this issue.

---

ALC GOALS ESTABLISHED FOR DATA COLLECTION: 2016 – 2017

Mission of Academic Program (include URL): [http://www.usfsp.edu/scl/anthropology/](http://www.usfsp.edu/scl/anthropology/)

It is the mission of this program to educate students in the field of Anthropology which is the global, comparative study of human biological variation and cultural systems over all periods, from the prehistoric to the present. Our undergraduate program is designed to give students a sound intellectual grounding in the discipline’s four main areas of research: Biological Anthropology; Archaeology; Cultural Anthropology; and Linguistics. Our perspectives are worldwide, but we also study nearby communities in trying to understand patterns of human physical differences, language, religion, marriage customs, conflict resolution or the evolution of societies themselves. Students completing the undergraduate degree are prepared to enter graduate programs in Anthropology but also find employment in a wide variety of settings including archaeological contract companies; conducting research on urban community development; studying immigrant populations and how best to serve the health, social, and educational needs of our increasingly diverse society

List Program Goal(s) / Objective(s):
Program Goals / Objectives must be mapped to College Goals / Objectives – use consistent nomenclature.
ALCs must address student learning in four areas: 1. Content/Discipline Skills; 2. Communication Skills; Critical Thinking Skills; and 4. Civic Engagement.

STUDENT COURSE REQUIREMENTS FOR ANTHROPOLOGY MAJOR
[http://www.usfsp.edu/catalog-undergrad/anthropology-major-requirements.htm](http://www.usfsp.edu/catalog-undergrad/anthropology-major-requirements.htm)

Students are required to take a minimum of 37 credit hours. The students are required to take 18 credit hours of Required Core Courses that are listed below.
To complete a major in anthropology students are required to take ANT 3101, ANT 2410, ANT 2511 (including the Lab section), and ANT 3610 as intermediate level training in the main subdivisions of the field. Students also are required to take ANT 4034, one of the methods courses, and one of the capstone courses listed below. ANT 2000, although suggested, is not a prerequisite to intermediate level courses. ANT 2000 may, however, be included in the 37 credit hour major requirement. Students who have not taken ANT 2000 must make up the missing hours with Anthropology elective coursework. Methods courses also may be counted toward the sub-field elective requirements. Majors are required to complete a minimum of 15 hours of 4000-level elective coursework, including courses
from at least three of the four elective subfield courses as well as ANT 4930, Special Topics courses.

**Required Core Courses**
- ANT 2410 Cultural Anthropology (3)
- ANT 2511 Biological Anthropology (3) must be taken with ANT 2511: Biological Anthropology Lab (1)
- ANT 3101 Archaeology (3)
- ANT 3610 Anthropological Linguistics (3)
- ANT 4034 Theories of Culture (3)

**Required Method Course, 3 hours from one of the following:**
- ANT 4495 Methods in Cultural Research (3)
- ANT 4930 Archaeological Method and Theory (3)
- ANT 4442 Urban Life & Culture (3)
- ANT 4930 Visual Anthropology (3)

**Required Capstone Course, 3 hours from one of the following:**
- ANT 4302 Gender in Cross-Cultural Perspectives (3)
- ANT 4312 North American Indians (3)
- ANT 4935 Rethinking Anthropology (3)

Beyond the required prerequisites listed above, the major in Anthropology consists of a minimum of 37 credit hours. In order to graduate, students must maintain an average best attempt 2.5 GPA in all courses counted toward the major. In addition, students must have a minimum C (2.0) grade in the senior core class ANT 4034 and in one of the following: ANT 4302, ANT 4312, or ANT 4935. A C- grade is not acceptable.

**Availability of Required Course at USFSP Anthropology Major**
The anthropology courses at USFSP are taught by three full time, tenured faculty, 1 visiting full-time faculty, 1 faculty member split with ISS, and at least one adjunct. We offer every required course at least once every two academic years, but most required courses are offered at least once in an academic year.

Every Semester: ANT 2000 Introduction to Anthropology and ANT 2410 Cultural Anthropology is taught every spring and fall semester and occasionally during the summer.

Once a Year: ANT 2511 (Biological Anthropology), ANT 3101 (Archaeology), and ANT 3610 (Anthropological Linguistics) are taught once every academic year. ANT 3101 (archaeology) also is taught occasionally during the summer.

Once Every Two Years: ANT 4034 (Theories of Culture) and ANT 4935 (Rethinking Anthropology), ANT 4495 (Methods in Cultural Research), and ANT 4930 (Archaeological Method and Theory).

However, we are concerned that with the future retirement of Dr. Ella Schmidt who teaches ANT 4302 a required capstone and Dr. Jay Sokolovsky who teaches ANT 2410 Cultural, ANT 4034 Theories and ANT 4495 Methods in Culture that it will be extremely difficult if not impossible to continue to offer all required courses in a timely manner. Therefore, we need university support to replace these lines within anthropology.

**Assessment of Student Learning Outcomes:**
To assess our Student Learning Outcomes we conduct an analysis every two years of SLO in six of our upper division required courses to assess how our majors perform in our program. We selected these courses for our assessment because all student majors must take these courses to receive a
degree at USFSP anthropology and because they are upper division courses we feel more confident that students registered in these courses have decided to and will graduate with a major in anthropology. Many of our lower division courses are also open to non-majors. These courses are:

ANT 4034 Theories of Culture (3)
ANT 4495 Methods in Cultural Research
ANT 4034 Theories of Cultures
ANT 4935 Rethinking Anthropology
ANT 4302 Gender in Cross-Cultural Perspective
ANT 4312 North American Indians
ANT 4114 Seminar in Archaeological Methods and Theory
ANT 4930 Visual Anthropology

| 2c. Contribute effectively to group discussion | 2c. ANT 4034 Theories of Culture
Students must participate in weekly group discussion of readings and in presentation of group plays related to key theorists and theoretical ideas. The primary mechanism for assessing group participation is the writing of individual scripts by students for the theorist that they portray in group performances. Scripts, performances and group discussion are assessed on the ability of students to represent accurately the theoretical ideas of the scholars in question. | 2c. 70% of the students will attain an average of 80% or more on Class Participation and the group play. | 2c. 95% of students will attain an average of B or better on the class participation and group play. | 2c. No change planned |
|                           | 2c. ANT 4312 North American Indians
