St. Petersburg Events Inc. to support environmental science scholarships at USF St. Petersburg

St. Petersburg, Fla. (March 22, 2002) – St. Petersburg Events Inc., has committed to contributing a portion of the proceeds from Americas’ Sail 2002 — St. Petersburg to scholarships for the new environmental sciences program at the University of South Florida St. Petersburg.

The Environmental Sciences and Policy program for undergraduates at USF St. Petersburg equips students for work in the environmental industry, focusing on issues including increased population, technology, globalization, and diminishing natural resources. This program is in high demand across the country and is especially pertinent to the critical water and land challenges facing Pinellas County and the west coast of Florida.

USF St. Petersburg, the only public university in Pinellas County, serves 4,000 undergraduate and graduate students.
