This guide allows researchers at the Louis de la Parte Florida Mental Health Institute (FMHI) to discover some of the archival treasures available in the FMHI Library, and also satisfies the exit requirements for an independent study project in the School of Library and Information Science, University of South Florida.

Faculty and staff at the FMHI Library offered advice, camaraderie, and a "bottomless" cup of coffee. The author gives his deepest appreciation to Ardis Hanson, Library Director at the FMHI Library. A sage cataloguer and consummate professional, Ardis serves as an excellent rôle model for aspiring librarians. Leslie Chason and Walter Cone also offered insight and technical expertise throughout the course of this project.

In addition, the author extends a debt of gratitude to all faculty in the University of South Florida’s School of Library and Information Science, with special appreciation given to Drs. Vicki Gregory and John M. Knego. Through her lectures that covered the subjects of technical services, cataloguing, and collection assessment, Dr. Gregory prepared the author for the formidable task of designing this collection guide.

Finally, the author expresses his appreciation for the love and support offered by his fiancée, Phuongdung Hoang Ta. The author will exchange his solemn wedding vows with Phuongdung less than one week after completing this index, on Sunday, 8 December 1996.
