

Board of Directors Meeting

November 13, 2008

Information: VoIP Purchase

Item VI. C

At the October 2008 meeting the Board authorized the JWB Executive Director to enter into a contract with the lowest responsive bidder for a provider of a VoIP (Voice over Internet Protocol) telephone communication not to exceed \$70,000.

The IT department released an Invitation to Bid seeking providers of VoIP service to replace the current obsolete PBX (Private Branch Exchange) telephone system. Of the four proposals submitted, Mytel Networks best met all stated requirements outlined in the proposal and therefore has been selected as the provider.

JWB has contracted with Mytel Communications for up to \$69,498 for the installation of the VoIP system.
